STIMULANTS

Cocaine-induced vent. arrhythmias → NaHCO3

Agitation, psychosis, ↑Temp, ↑BP, ↑HR → BZD+Fluids, COOL

Caffeine (Tachyarrhythmias, GI distress) → Esmolol, H2-blockers
SUMMARY

OPIATES
CNS and resp. depression
Withdrawal
→ Narcan

Hallucinogens
Psychosis
→ Haldol, calm environment

GHB
Myoclonic activity
CNS and respiratory depression
→ Supportive measures, usually rapid recovery
SUMMARY

Sedative-hypnotics
CNS and resp. depression

Supportive care, use caution with Romazicon

Phenobarbital

MDAC, ↑Urine pH, dialysis

Withdrawal

See alcohol withdrawal notes
SUMMARY

Alcohol Withdrawal

Hyperadrenergia  →  Benzos, fluids, cooling

Psychosis  →  Haldol, calm, environment
